

School Meal Account Balance Policy

Any full-pay or reduced elementary student with an account balance of **-\$20.00 or greater**, will be given cereal and milk. This will be given to the student for a period of three days. If at the end of this three day period, Andover Food Services has not been notified as to payment arrangements or if payment has not been made, charges will not be allowed. The student must bring payment to purchase a lunch or bring a lunch to school. This policy helps to operate a balanced program for Andover School District.

When account balances are at zero or below, juice and/or extra purchases are not allowed. Please remember that the snack milk program is an ala carte program that requires a positive lunch account balance for the student to participate.

Students who qualify for free meal benefits and have negative lunch account balances (due to ala carte or snack milk purchases) cannot be denied a school meal, as established by USDA.

Please contact the Food Service Office with any questions.
